Security troops show off high-tech security system

Left: Airmen 1st Class Mark Trueman and Daniel Parks, 8th Security Forces Squadron tactical automated security system administrators, set up the Wide Area Surveillance Thermal Imager Aug. 22 here, in preparation for a demonstration for distinguished visitors.

Below: Tech. Sgt. John Turner, 8th SFS TASS NCO-in-charge , operates the handheld monitor while Trueman monitors the sensor field with the annunciator laptop.

Photos by Master Sgt. Michael Casados

Above: Parks is configuring the communications module as he observes the 310 Biostatic Microwave Sensors mounted on Tripod A. Another sensor mounted on a second tripod (not pictured) is required to complete the security beam.

Right: Turner configures the TASS handheld monitor so it can monitor alarms.

Above: Trueman uses a joystick to test the maneuverability of the WSTI while observing its movements on a monitor.
